

Darrin Duncan

Accomplished, results-driven Front-End Developer with over 5 years of front end experience and a passion for responsive design using the mobile-first approach. Proven abilities to create and improve User interfaces and web applications using HTML, CSS, and JavaScript.

EXPERIENCE

Nutrisystem, Inc., Fort Washington, PA

Front-End Web Developer: DECEMBER 2018 - PRESENT

- Develop the web front-end code for Nutrisystem e-Commerce sites using HTML, CSS, JavaScript, and ES6.
- Work closely with the creative and development teams to build, test and deliver high-quality web assets.
- Build responsive user interfaces with Bootstrap and Sass from Adobe XD design assets.
- Retrieve content assets from ATG database through APIs and display them within components on the front-end using React.
- Collaborate with marketing and research teams to incorporate brand elements and relevant market research findings into website.

Gateway Ticketing Systems, Inc., Gilbertsville, PA

Front-End Web Developer: APRIL 2018 - DECEMBER 2018

- Build custom themed e-commerce websites for clients based on UI designs and mock-ups submitted by the client.
- Develop new features for new and existing e-commerce websites.
- Collaborate with the Customer Service team to troubleshoot and resolve website issues.
- Utilize HTML5, CSS3, JavaScript, JQuery, Angular JS, Jade, Stylus, Google Analytics, version control and UX Design principles to ensure an exceptional experience for clients.

Dynalene, Inc., Whitehall, PA

Web Developer: MAY 2017 - April 2018

- Develop an intranet portal with Wordpress, PHP and MySQL. The completed project increased communication and collaboration between management and employees by up to 80% within 3 months of launch.
- Develop a web form with PHP and MySQL, which captured online inquiries. The number of inquiries radically increased compared to prior years.
- Ensure website function and stability across desktop and mobile.
- Optimize website for maximum speed and scalability.
- Incorporate FedEx and UPS tracking APIs into e-commerce website.
